

To be used following an actual or suspected personal data breach

1 Introduction

- 1.1 The School understands the importance of keeping personal data secure and of effectively dealing with data breaches. This is essential for maintaining the trust of staff, pupils and their parents when the School uses their information.
- 1.2 This policy and procedure is to be used by the School's Data Breach Response Committee in the event of a data breach at the School (or a suspected data breach). The Committee is comprised of the senior members of staff (named at section 4.1 below) who will deal with different aspects of a data breach.
- 1.3 All staff should receive training on how to recognise a data breach as defined by this Policy. The School's Acceptable Use Policy also stipulates the need to report all personal data breaches. Both policies should be reviewed and signed by staff annually.
- 1.4 The School is required to report certain breaches to the Information Commissioner's Office (ICO) and to data subjects under the General Data Protection Regulation (GDPR). There are strict timescales for reporting breaches which are outlined in section 7.
- 1.5 If a data breach occurs, the Senior Deputy Head or Head/Headteacher and the Compliance Officer will assess the data breach immediately. Any minor breaches will be recorded on the Data Breach Register (Appendix 2) and steps taken to recover the data or take it out of circulation. Such breaches would be, for example, the sharing of a personal email address. To assist with this process, the ICO Self-assessment for data breaches tool can be used - <https://ico.org.uk/for-organisations/report-a-breach/personal-data-breach-assessment/> Ensure that the self-assessment tool results are saved for future reference. Any more significant breaches would require the committee to be formed and protocol followed as described in section 4.

2 Immediate action following a data breach

- Inform all members of the Data Breach Response Committee.
- Identify what personal data is at risk.
- Take measures to prevent the breach from worsening e.g. changing password/access codes, removing an email from pupils' inboxes which was sent by mistake.
- Recover any of the compromised personal data e.g. use back-ups to restore data.
- Consider whether outside agencies need to be informed as a matter of urgency e.g. the police in the event of a burglary or Children's Services where the breach may lead to serious harm being caused to a pupil.
- Consider whether any affected individuals should be told about the breach straight away. For example, so that they may take action to protect themselves or because they would find out about the breach from another source. Please note this is different to the mandatory notification to individuals covered at 8.2 - 8.6 below which does not need to be an immediate notification.

3 What is a data breach?

3.1 A data breach is a breach of security which leads to any of the following:

- 3.1.1 the loss of personal data.
- 3.1.2 the accidental or unlawful destruction of personal data.
- 3.1.3 the disclosure of personal data to an unauthorised third party.
- 3.1.4 the unlawful or accidental alteration of personal data.
- 3.1.5 unauthorised access to personal data.

3.2 Personal data is information:

- 3.2.1 from which a person can be identified (either from the information itself or when combined with other information likely to be used to identify the person).
- 3.2.2 which relates to that person.

3.3 The following are examples of personal data held by the School:

- 3.3.1 names and contact details of pupils, parents and staff.

- 3.3.2 financial information about parents and staff.
- 3.3.3 pupil exam results.
- 3.3.4 images of pupils.
- 3.3.5 safeguarding information about a particular family.
- 3.3.6 information about pupil behaviour and attainment.
- 3.3.7 a pupil or staff member's medical information.

3.4 If staff are in any doubt as to whether an incident constitutes a data breach they must speak to the Senior Deputy Head or Heads of the Senior or Junior schools immediately. Alternatively, they can contact the School's Compliance Officer.

3.5 Please see 0 for examples of data breaches.

4 Roles and responsibilities

4.1 The following staff form the School's Data Breach Response Committee (the **Committee**) and will have certain responsibilities:

<u>Role</u>	<u>Responsibility</u>
The Chief Operating Officer	<ul style="list-style-type: none"> • chair the Committee and is responsible for co-ordinating the School's response to any breach. • lead on any physical security measures which are required at the School site to contain the breach. • responsible for notifying and liaising with the School's Governors and/or insurers as required. • lead on any staff welfare or disciplinary issues in consultation with the Heads of either the Senior or Junior Schools.
The Compliance Officer	<ul style="list-style-type: none"> • owner of the Personal Data Breach Register and will manage the reporting process for any Notifiable Breaches.
Senior Deputy Head	<ul style="list-style-type: none"> • responsible for any communications with the senior school's pupils and parents/guardians and for any

	pupil welfare or staff training or disciplinary considerations. They will also inform the Head where necessary.
Headteacher of the Junior School	<ul style="list-style-type: none"> responsible for any communications with pupils and parents/guardians and for any pupil welfare, staff training or disciplinary considerations.
The Head of IT Network Infrastructure	<ul style="list-style-type: none"> responsible for the maintenance of the School's IT servers thereby ensuring the security of the School's ICT infrastructure. taking any possible technical measures to recover personal data or to contain a data breach.
Director of Marketing and Communications	<ul style="list-style-type: none"> responsible for assessing any reputational damage and all press liaison.
Assistant Head – Pastoral Care & Designated Safeguarding Lead (DSL).	<ul style="list-style-type: none"> responsible for assessing any safeguarding concerns and taking associated action. Will co-opt in the DSL for the Junior School where necessary.

4.2 The Committee will form as soon as possible once a data breach has been identified.

5 **Containment and recovery**

5.1 As soon as a data breach has been identified or is suspected, steps must be taken to recover any personal data and to contain the breach. For example, the School may need to:

5.1.1 Notify its insurers immediately if the data breach is related to a cyber attack.

5.1.2 change any passwords and access codes which may have been compromised.

5.1.3 if appropriate in all the circumstances, tell staff to notify their bank if financial information has been lost (or other information which could lead to financial fraud) and offer credit protection.

5.1.4 limit staff and/or pupil access to certain areas of the School's IT network.

5.1.5 use back-up tapes to restore lost or damaged data.

5.1.6 take any measures to recover physical assets e.g. notifying the police or contacting third parties who may have found the property.

5.1.7 take action to mitigate any loss.

5.2 The Committee should decide what action is necessary and which member(s) of the Committee will be responsible for the different aspects of the containment and recovery. Where appropriate the Committee will delegate tasks to other members of staff with the relevant expertise.

5.3 The Committee should seek assistance from outside experts if appropriate to effectively contain the breach and recover any personal data. For example, legal advice, reputation management advice or specialist technical advice.

6 **Establishing and assessing the risks**

6.1 The next stage in the process of dealing with a data breach is to establish and assess the risks presented by the breach. To assist with this process, the Committee should document the answers to the questions contained in Appendix 3 in as much detail as possible.

6.2 The table in Appendix 3 should be copied into a new document in order to retain a record of this process.

7 **Notification**

Notification to the Information Commissioner's Office

7.1 The School is required to report a data breach to the ICO unless the breach is unlikely to result in a risk to the rights and freedoms of individuals. The exercise which was documented under section 6 above should be used to determine if a notification to the ICO is required.

7.2 "Risk to the Rights and freedoms of individuals" should be interpreted broadly. Please see row 5 of Appendix 3.

7.3 Any decision to not notify the ICO should be documented. It is possible that if another data breach occurs in the future that the ICO will ask why any previous breaches were not reported and the ICO is likely to ask to see evidence of any decision to not notify.

7.4 If the School decides to notify the ICO then this must be done without undue delay and where feasible within 72 hours of having become aware of the breach.

8 **Content of the notification**

8.1.1 The ICO has set out procedures for notifications on their website (<https://ico.org.uk/for-organisations/report-a-breach/personal-data-breach/>) which must be followed.

- 8.1.2 If it has not been possible to submit the notification to the ICO within 72 hours of becoming aware of the breach, the notification must explain the reason for this delay. For example, that the School has been instructed by the police to postpone the notification to the ICO.
- 8.1.3 If it is not possible to provide all of the information at the same time, the School should provide the information to the ICO in phases without further undue delay. For example, the School could make an initial notification within the 72 hour period with a more detailed response the following week once the School has more information on what happened.
- 8.1.4 The initial notification should include points such as the possible cause of the breach and how the School plans to deal with the breach including mitigation actions.
- 8.1.5 The more detailed response should set out as clearly as possible the steps the School has taken to prevent a reoccurrence. The ICO is less likely to take enforcement action if it considers that the School has already taken steps to address what went wrong.

Contacting affected individuals

- 8.2 The School is required by the GDPR to report a data breach to the individuals whose data has been compromised (known as data subjects) where the breach is likely to result in a high risk to the rights and freedoms of individuals. It may not always be clear which individuals should be notified, for example, parents may need to be notified rather than their children.
- 8.3 The School should use the exercise at section 6 above to assist with this decision. A notification does not need to be made where:
 - 8.3.1 the School had taken measures so that the data compromised was unintelligible to any person not authorised to access it (e.g. it was encrypted); or
 - 8.3.2 the School has managed to contain the breach or take mitigating action so that any high risk to individuals is no longer likely to materialise (e.g. an unencrypted memory stick has been recovered before anyone was able to access the data held on it).
- 8.4 If the School decides not to notify individuals this decision must be documented.
- 8.5 If a notification is sent this must be done so without undue delay. The School should work with the ICO in determining when is the most appropriate time to notify the individuals. Other outside agencies, such as the police, Charity Commission or Action Fraud may also have a view regarding the timing of this notification.

8.6 The ICO may advise or require the School to notify individuals. In addition, the ICO has the authority to require a more detailed notification to be given to individuals. The ICO is given these powers under the GDPR.

8.7 **Content of the notification to individuals**

8.8 The notification to individuals must include the following as a minimum:

8.8.1 the name and contact details of a person at the School who can provide more information. The Committee should choose the appropriate staff member at the School, which is likely to depend upon which individuals are affected.

8.8.2 a description of the likely consequences of the data breach.

8.8.3 a description of the measures taken or proposed to be taken by the School to address the data breach, including, where appropriate, measures to mitigate its possible adverse effects.

8.9 In addition, the School must consider if any additional information would be helpful to data subjects. For example, instructions on measures which they can take to protect their data now or in the future.

8.10 The notification must be drafted in clear language. If directed at pupils the notification should be age appropriate.

8.11 The Committee should decide what is the most appropriate method of communication for the notification. Factors to consider include the urgency of the notification. For example, it may be appropriate to telephone individuals followed up with an email.

Notification to the police

8.12 The School should consider whether the police need to be notified about the data breach because it is possible that a criminal offence has been committed. However, there is no legal obligation to notify the police. The following are examples of breaches where a criminal offence may have been committed:

8.12.1 theft e.g. if a laptop has been stolen.

8.12.2 Burglary.

8.12.3 if a staff member has shared or accessed personal data where this was not required as part of their professional duties e.g. a staff member shares information about a pupil with famous parents with the local press.

8.12.4 the School's computer network has been hacked (e.g. by a pupil or a third party).

- 8.13 Action Fraud is the national fraud and cybercrime reporting centre. It can be contacted on 0300 123 2040 or using www.actionfraud.police.uk

Notification to Others

- 8.14 If the breach is reported to the ICO, the School must report the breach to The Charity Commission, using the guidance of the Serious Incident Reporting code of practice.
- 8.15 The Governing Body must also be informed of any serious data breaches that are reported to the ICO.

9 Internal Breach Register

- 9.1 The School is required to keep a register of all data breaches including those which do not meet the threshold to be reported. Staff should be trained to report all data breaches to allow the School to meet this requirement.
- 9.2 The Chief Operating Officer is ultimately responsible for keeping this register up to date, but may delegate this responsibility to the Compliance Officer.

10 Evaluation

Evaluation of the School's security measures

- 10.1 The School is obliged under the GDPR to implement technical and organisational measures to protect personal data. The School regularly evaluates of the effectiveness of both its organisational and technical measures.
- 10.2 Organisational measures include:
- 10.2.1 policies for staff on their data protection obligations, including when working away from the School site or when using their own devices.
 - 10.2.2 guidance for staff on how to use specific computer applications and software securely.
 - 10.2.3 data protection training for staff.
- 10.3 Technical measures include:
- 10.3.1 the use of encryption (as referenced in our ICT Acceptable Use Policy).
 - 10.3.2 two factor authentication.
 - 10.3.3 limiting access to certain areas of the School's IT network.
 - 10.3.4 firewalls and virus protection.
 - 10.3.5 the use of backups.

- 10.4 The Committee should establish how the existing measures could be strengthened and what additional measures should be put in place to guard against future data breaches. The Committee should consider both breaches of a similar type to that which has occurred and the risk of security breaches more broadly.
- 10.5 The Committee may delegate this task to one or more appropriate members of staff. The Committee should consider whether legal and/or technical advice is required.
- 10.6 This exercise should be undertaken promptly because the actions taken by the School to improve its practices will likely be taken into account by the ICO when considering if enforcement action should be taken against the School.
- 10.7 Key points to consider include:
- 10.7.1 Would improvements in the training given to staff have prevented the breach or lessened the severity of the breach?
 - 10.7.2 Can measures be taken to speed up the process of staff reporting breaches?
 - 10.7.3 Does the School's Information Security Policy need to be revised?
 - 10.7.4 Are changes required to the School's IT system?
 - 10.7.5 Should the School's document management system be made more robust? For example, should staff's ability to access certain documents be limited to a greater extent?
 - 10.7.6 Does the physical security of the School, particularly in areas where personal data is kept, need to be improved?
 - 10.7.7 Do the School's remote working practices need to change?
 - 10.7.8 Does the School need more robust procedures around staff using their own devices for School work?
 - 10.7.9 Do the School's contracts with processors (e.g. a Cloud storage provider) need to be revised?
 - 10.7.10 Does the School need to do more robust due diligence on its processors?
 - 10.7.11 If any IT services providers were contracted by the School to carry out work related to information security was the service provided adequate?
- 10.8 The Committee should report the outcome of the evaluation to the Chair of Governors before implementing any necessary changes.

Evaluation of the School's response to the data breach

- 10.9 When the immediate action has been taken following the data breach, the School should evaluate how its initial response to the breach could have been better.
- 10.10 Key points to consider:
- 10.10.1 Was the breach reported to the Chief Operating Officer, Heads of either the Senior or Junior schools or Compliance Officer immediately? If not, what action can be taken to speed up the process of contacting a senior member of staff.
 - 10.10.2 Were all possible measures taken to recover the data promptly?
 - 10.10.3 Could more have been done to contain the breach as quickly as possible?
 - 10.10.4 If one of the School's processors (e.g. a payroll supplier) was either responsible for the breach, or discovered the breach, was this notified to the School without undue delay? If not, what measures can be put in place to improve this communication in the future?
- 10.11 The Committee should report the outcome of the evaluation to the Chair of Governors before implementing any necessary changes.

11 Tactical considerations

- 11.1 The School should refer to 0 which outlines tactical and supplemental considerations. For example, is any pupil disciplinary action required?

12 Monitoring and review

- 12.1 The Chief Operating Officer should ensure that this policy is regularly reviewed and updated as required.
- 12.2 This policy should be reviewed following any data breach at the School which meets the threshold to be reported to the ICO.

Appendix 1 - Examples of data breaches and the next steps

Example of breach	Containment and Recovery	Establishing and Assessing the Risks	Notification	Evaluation of the School's response to the data breach
<p>A staff member leaves papers containing information about pupils' academic performance on a train. The papers were not in a locked case.</p>	<p>The School should find out if it is possible to retrieve the papers. For example, by calling the train company's lost property department.</p>	<p>The School should work through the questions in Error! Reference source not found. below and the self-assessment tool on the ICO website https://ico.org.uk/for-organisations/report-a-breach/</p>	<p>If the papers are not retrieved then this breach will need to be notified to the ICO.</p> <p>Whether a notification to the pupils and their parents is required will depend upon the nature of the personal data.</p> <p>The School should consult section 7 of this policy.</p>	<p>The School should work through sections 10.9 to 10.11 of the policy above.</p>
<p>Ransomware locks electronic files containing personal data.</p>	<p>Immediately, contact the School's insurance company (CFC) who will support the school in the recovery and containment of the breach. The School should have a back-up of the data and should also</p>	<p>The School should work through the questions in Error! Reference source not found. below and the self-assessment tool on the ICO website https://ico.org.uk/for-organisations/report-a-</p>	<p>Depends on factors such as whether the School was able to recover the data and whether there is any other risk to the School's systems</p>	<p>The School should work through sections 10.9 to 10.11 of the policy above</p>

	ensure that its systems are secured (e.g. that the ransomware has been removed).	breach/personal-data-breach/.		
Sending an email containing personal data to the incorrect recipient.	Use the recall email feature if available. If the email is internal, speak to IT immediately to see if it can be deleted from their email account. Immediately send another email with subject title of 'DELETE THE PREVIOUS EMAIL' Consider calling the unintended recipient and asking them to delete the email	The School should work through the questions in Error! Reference source not found. below and the self-assessment tool on the ICO website https://ico.org.uk/for-organisations/report-a-breach/personal-data-breach/ .	Depends on the sensitivity of any personal data contained in the email, whether the unintended recipient has agreed to delete it etc.	The School should work through sections 10.9 to 10.11 of the policy above

Appendix 2 - Data Breach Register

The Chief Operating Officer is responsible for keeping this register up to date, but will delegate day to day responsibility to the Compliance Officer.

Date of breach	Outline of facts	Effect of the breach	Remedial action taken	Regulatory bodies informed if any e.g. ICO

Appendix 3 - Establishing and Assessing the Risks Presented by the Data Breach

	Question	Response
1.	Precisely what data has been (or is thought to have been) lost, damaged or compromised?	
2.	<p>Is any of the data Critical School Personal Data? This would be:</p> <ul style="list-style-type: none">i. information concerning child protection matters;ii. information about serious or confidential medical conditions and information about special educational needs;iii. information concerning serious allegations made against an individual (whether or not the allegation amounts to a criminal offence and whether or not the allegation has been proved);iv. financial information (for example about parents and staff);	

- v. information about an individual's racial or ethnic origin; and
- vi. political opinions;
- vii. religious beliefs or other beliefs of a similar nature;
- viii. trade union membership;
- ix. physical or mental health or condition;
- x. genetic information;
- xi. sexual life;
- xii. information relating to actual or alleged criminal activity; and
- xiii. biometric information (e.g. a pupil's fingerprints following a criminal investigation).

If any of these types of data are involved this makes the breach more serious.

3.	Who are the affected individuals e.g. staff, parents/guardians, pupils, third parties?	
4.	How many individuals have definitely been affected and how many potentially affected in a worst-case scenario?	
5.	<p>What harm might be caused to individuals (not to the School)? The individuals do not necessarily need to be those whose personal data was involved in the breach.</p> <p>Harm should be interpreted broadly, for example to include:</p> <ul style="list-style-type: none"> (a) distress; (b) discrimination; (c) loss of confidentiality; (d) financial damage; (e) identity theft; (f) physical harm; and 	

	(g) reputational damage.	
6.	What harm might be caused to the School? For example, reputational damage and financial loss.	
7.	<p>What mitigating factors may have lessened the risks presented by the breach? The following questions may assist when considering this point.</p> <p>(a) Were any physical protections in place to limit the impact of the breach e.g. was the data contained in a locked case when it was lost/stolen?</p> <p>(b) Were any technical protections in place e.g. was the data protected by encryption?</p> <p>(c) Have measures been taken to contain the breach e.g. have banks being notified where financial information has been compromised?</p> <p>(d) Have measures been taken to recover the data e.g. has lost data been found before</p>	

	<p>being seen by any unauthorised party or have back-ups been used where electronic information was lost or damaged?</p>	
--	--	--

Appendix 4 - External advice

Legal advice

The School should consider taking legal advice in relation to the following. Please note that this is not an exhaustive list but should be used as a guide.

1. Determining whether to notify the ICO and the data subjects.
2. Drafting the notification to the ICO and the data subjects.
3. Any correspondence with other external agencies such as the Independent Schools Inspectorate, the Department for Education or The Charity Commission.
4. Any communications with the police.
5. The decision to notify the School's insurers.
6. Any communications with staff members, pupils and parents.
7. Any disciplinary action in relation to pupils or staff.
8. Establishing whether there is a risk that an affected individual might bring a legal claim against the School.

Reputation management

The School should consider obtaining advice regarding reputation management. This advice may be provided by solicitors or by other specialists. As above, this is not an exhaustive list but should be used as a guide.

The following circumstances in particular may require specialist advice:

1. If the data breach becomes widely known to the parental community.
2. If news of the breach becomes known outside of the School community.
3. If the media report on the breach or ask the School for a statement.
4. If the ICO take enforcement action which may become public knowledge.

Appendix 5 - Tactical and supplemental considerations

This appendix should be completed to assist the School in checking that all issues surrounding the data breach have been considered. It is not an exhaustive list but may assist the Committee when handling the consequences of the data breach.

Supplemental issue	Considerations
Pupil welfare	
Staff welfare	
Parent/guardian complaints	
Staff disciplinary action	
Pupil disciplinary action	
Reputation management	
Risks of legal claims
